## EDUCATION

Ranken Technical College  
A.S. Computer Technology 2016

Southern Illinois University  
Edwardsville  
Computer Science

## SKILLS

Windows, Linux, Troubleshooting, Computer Hardware, Windows Server, Networking, Matlab, Public Speaking, Programming, C++, PHP, Bash / UNIX Shell, PowerShell, Amazon Web Services (AWS), EC2, Virtualization, Hyper-V, Docker

## EXPERIENCE

### Black Sun Network

Owner & System Administrator

Seattle, WA

2012 to Current

Ownership and system administration of several Linux and Windows servers and network services in support of an online community.

Responsibilities include:

- Maintenance of data and community continuity with robust automated backups
- Creation of reproducible, reliable network services using modern deployment practices such as Docker containers and cloud computing on AWS EC2 instances
- Integration and monitoring of servers via web dashboard
- Issuing consistent communication with community stakeholders regarding current events and issues

### SIUE Solar Racing Team

Mechanical Director

Edwardsville, IL

2013 to 2014

In charge of all mechanical design, fabrication, and implementation, including computer modeling and simulation.

Responsibilities include:

- Performing finite element analysis to test the structure of the frame design
- Design and fabrication of structural reinforcement
- Communicating with race officials to ensure all safety checks passed prior to racing
- Drafting and presentation of fundraising proposal to school officials

## CERTIFICATIONS

### Microsoft Certified Professional (MCP)

Microsoft Certified Technology Specialist (MCTS): Windows 7, Configuration

- Deployment and migration to Windows 7, including techniques for imaging and mass provisioning
- Configuration and troubleshooting of hardware, network connectivity, and mobility options
- Maintenance of systems, including backup and system recovery

Administering Windows Server 2012

- Deployment of services such as Windows Deployment Services (WDS) and Windows Server Update Services (WSUS)
- Configuration and management of Active Directory and Group Policy

### CompTIA A+

- Understanding network operation including concepts such as IPv4, IPv6, TCP, DHCP, and DNS
- Securing organizations with proper authentication, access control, and encryption
- Deployment of systems using virtualization, cloud computing, and imaging
- Diagnosing and resolving hardware and software issues
